Assessment Pulls

Why: To link CTEIS students' UIC's with the vendors that do the assessment so we get a good match for the student identifier (UIC) from the vendor.

How: OCTE provides a data extraction service to all CTEIS Enrollment reporters to ease the process of organizing skill assessment tests for Concentrators and Completers. To take advantage of this service, simply enroll your students into the appropriate classes via Manage Enrollment. OCTE will allow assessment test vendors to collect your enrollment data for use in setting up the required spring testing on three separate dates in 2015. If you would like to take advantage of this service, please be sure to see that your students eligible for assessment are properly enrolled in course in their program. From this, we will be able to extract all the students currently enrolled in that program and provide that information to the appropriate test vendor.

When:

November 27, 2015
January 8, 2016
March 25, 2016
April 15, 2016
